

2021 Sewerfest
Wilkesboro Campground
at the Water Treatment Facility
October 7-10 2021

I arrived on Thursday afternoon, right after a rain shower.

Here is how the campground filled up with just Sewerfest attendees, we had the place to ourselves. This is about 1/3 of available sites.

The settling tanks are straight to the back of the photo, down the hill.

The tanks are actually farther away than they appear in this photo.

[More Pictures](#)

Taken Thursday Afternoon, I am close to the PTX on the left since I installed a power tongue jack on their trailer on Friday. The slots to the right of me filled up.

Sitting round the campfire Sat Nite.
